

# Meeting to discuss about First Interactive UI with Supervisor - 11 Feb 2023

## Meeting information

Meeting time	2:03 pm - 4:15 pm (IST)
Meeting date	13 Jan 2023
Meeting topic / objectives	Summary the progress of working on the first Development phases (on Interactive UI during Tet holiday) and give feedback for improvement
Method	Offline meeting - Room I82 - HCMUS, HCMC, Vietnam

## Members and roles

ID	Member	Role
1	Dr. Nhan Le Thi	Supervisor
2	Tan Le Tran Ba	Interviewer
3	Nhan Nguyen Cao	Support Secretary
4	Chuong Pham Dinh	Support Interviewer
5	Trang Ho Ngoc Thao	Secretary

## Meeting actions

Action / Discussion	Person responsible	Note (if available)
Greetings	1, 2, 3, 4, 5	

Action / Discussion	Person responsible	Note (if available)
Dr. Nhan asked about not being able to login to the staging server	1, 4	Team supported Dr. Nhan, using Google provider account instead of regular email. Dr. Nhan feedbacked about how to navigate back to the home page from authentication pages
Dr. Nhan asked team to update about the progress of collecting feedback from the medical university students about Interactive UI - V1	1, 2	Team mentioned that up to the meeting, team has received 2 feedback from 2 students. The remaining 3 were having some duties to deal with for the upcoming exams and agreed to give feedback later
Team asked for the feedback from Dr. Nhan on Interactive UI - V1	1, 3, 5	Dr. Nhan started giving feedback while opening the site on her laptop
Dr. Nhan feedback about the homepage: not balanced and too much information shown	1	Dr. Nhan had difficulties understanding how the team was using an image to represent the area of the page that would be replaced by the model later on
Team asked follow-up question about suggestion and discussed with Dr. Nhan about solutions for improvement	1, 2, 3	Dr. Nhan suggested following Google Maps as an example: show the model right on the home page and leave the icons only on the corner, with small size to allow large space for the model
Dr. Nhan attempted the Information showing on acupuncture points and meridians and gave feedback	1	Dr. Nhan believed that showing all information at once upon selection is too much, making it very difficult to follow. She suggested showing only the filtered information about description only. Full details can be shown in another page

Action / Discussion	Person responsible	Note (if available)
Dr. Nhan visited the full details page	1	Dr. Nhan feedback the page is good and provide enough information. She suggested re-validate the information is enough to meet with the expectations from the students or not
Dr. Nhan asked about the icon to visit the Advanced Search feature ⇒ She believed it is not easy to understand	1, 2	Dr. Nhan suggested add Advanced Search as one option from the side menu instead of using uncommon icon
Dr. Nhan tried the Quick Search feature and Advanced Search feature	1, 3, 5	Dr. Nhan feedback on showing "No results found" in case of failed search, instead of collapsing everything and showing no interactions
Dr. Nhan asked about the feedback from the students	1, 2	Team listed out some current feedback, but most of them are not very up to the expectations: Students give feedback on the model (while stated model would not be available in the first version, since teams have not been done with labeling all 361 acupuncture points yet) + Students give feedback on the data (although stated the current version, without Back-end integrated, only contains mock data) ⇒ Dr. Nhan suggested keeping contact and continuously asking for feedback to report as User Usability Testing results later on

Action / Discussion	Person responsible	Note (if available)
Dr. Nhan asked team to open the Quiz feature and tried some questions	1, 4	Dr. Nhan suggested the team should validate the questions with the medical university students or the specialist consultants to make sure that they are correct from acupuncture perspective and can be a good way to review.
Dr. Nhan asked whether the team can show the demo site for interacting with the model	1, 2	Team opened the demo path on staging server for the supervisor to try interacting with the model
Dr. Nhan gave feedback on adding hovering and clicking effects for the meridian lines and acupuncture points	1, 3, 5	Team took note and mentioned that we would spend time researching on that and adding them on the second version of interactive UI
Dr. Nhan gave question about whether team decide to allow multiple-point selection or not	1, 2, 3	Team stated that only 1 point or meridian would be selected at one time. Since choosing multiple items would conflict in which piece of information to show. Dr. Nhan agreed with the response
Dr. Nhan suggested about the control to the model. She was using trackpad on MacOS and cannot reach full interactions to the model	1, 2, 3, 4, 5	Team discussed and suggested that a control panel for second method of input interactions to the model would be added to the scene, so that all operating systems and devices would have no incompatibility in controlling the model.
Dr. Nhan suggested adding a landing page for showing basic information rather than putting them on the side panel on entering the home page	1, 2	Team noted down and agreed to try adding landing page on next version of Interactive UI

Action / Discussion	Person responsible	Note (if available)
Team mentioned again about the difficulties in communication with Dr. Liu	1, 3	Dr. Nhan agreed to keep moving on with the proposed solution for witness the trial to contact from Academic Affairs
Dr. Nhan mentioned about the schedule for the Midterm Review presentation	1	The Midterm Review would be on the week from 13 Mar - 17 Mar. Team should consider now which things to be presented. Dr. Nhan suggested: - Mention the difficulties in communication and any follow-up updates - Show the effort to build the first interactive UI version, how it was upgraded to become the second interactive UI version and show the demo to the coordinators.
Dr. Nhan asked about team's plan for the remaining time	1, 3, 5	Team define that: - Development (Coding) would last no longer than middle of April - The remaining time in April would be spent on User Testing and Enhancing - May would be spent on Documents completing and Preparing for the Defense ⇒ Dr. Nhan accepted that plan
Dr. Nhan asked for the estimated effort for next Interactive UI version	1, 2, 3, 4, 5	Team discussed and requested 2 weeks for the upgrade. However, since some students had not yet given feedback at that time, and there are many acupuncture points needed to be labeled, which can take a lot of time, it may take up to 3 weeks. Team will try to update the progress to Dr. Nhan and based on that would ask for the next meeting, as well as sending the second Interactive UI version to Dr. Nhan whenever it is ready.
Conclusion and Goodbye	1, 2, 3, 4, 5	

## Attendance report

Member	Joined	Leaved	In-meeting duration
1	1:52 pm	4:15 pm	2h 23m
2	2:02 pm	4:15 pm	2h 13m
3	2:03 pm	4:15 pm	2h 12m
4	2:03 pm	4:15 pm	2h 12m
5	2:02 pm	4:15 pm	2h 13m
