Meeting to discuss about Second Interactive UI with Supervisor - 4 Mar 2023

Meeting information

Meeting time	1:57 pm - 4:11 pm (IST)
Meeting date	4 Mar 2023
Meeting topic / objectives	Discuss and give feedback about the second Interactive UI. Discuss about plan for the upcoming Midterm Review and the remaining months for the project
Method	Online meeting - Google Meets

Members and roles

ID	Member	Role
1	Dr. Nhan Le Thi	Supervisor
2	Tan Le Tran Ba	Support Secretary
3	Nhan Nguyen Cao	Interviewer
4	Chuong Pham Dinh	Secretary
5	Trang Ho Ngoc Thao	Support Interviewer

Meeting actions

Action / Discussion	Person responsible	Note (if available)
Greetings	1, 2, 3, 4, 5	
Dr. Nhan asked team to show demo live on online meeting via Google Teams	1, 3	Team member showed his screen entering the staging server for Interactive V2

Action / Discussion	Person responsible	Note (if available)
Dr. Nhan gave feedback on the search bar.	1	According to Dr. Nhan, the use of magnifier for search feature is not common for everyone. She suggested adding a placeholder for better understanding.
Team and Dr. Nhan visited Google Maps home page for referencing	1, 2, 3	Dr. Nhan also suggested adding a tooltip for search icon and search button for better understanding
Dr. Nhan gave feedback about home page spacing	1, 4	Left spacing on the top but no right spacing on the top $\Rightarrow$ imbalance
Dr. Nhan gave feedback about the landing modal	1, 2	The landing modal is showing too many words, making it very difficult to understand
Dr. Nhan verified and gave feedback about the caption in the landing modal box	1, 5	She suggested that using the word "Interact" is too general, cause users may have many methods for Interacting $\Rightarrow$ Clearly define "Click to start" is a better option.
Dr. Nhan suggested another idea: Auto close the landing modal box after about 2-3 seconds (based on the amount of words shown)	1	Users would then have 2 different methods to close the box
Team member asked about whether the changes in approach of project should also change the name of the project	1, 2	Dr. Nhan said keeping the project name the same as originally defined by Dr. Liu. However, the name of the project is quite too long to be included in the landing modal box (should be in About us page instead) $\Rightarrow$ Show only the website name "Acupuncture 3D"
Dr. Nhan asked team member to demo hovering and clicking effects on the model	1, 3	Dr. Nhan thought that the hovering effect is good, but the mouse cursor should be changed so user would understand it is clickable

Action / Discussion	Person responsible	Note (if available)
Dr. Nhan asked the team to try the control panel with panning, rotating and zooming effect	1, 3	Dr. Nhan feedback that the size of the points are quite too small if we zoom out a lot $\Rightarrow$ Making it difficult to correctly click on the point for selecting. Two suggested approach: - Make the points a little bit larger - Widen the area around the point that is clickable to select the point
Dr. Nhan gave feedback on the way the labels are showing	1	She suggested that on zooming in up to a specific scale level, some labels should be displayed
Team added information about possible lag could happen if labels are displayed by default	1, 3	Dr. Nhan and team discussed, then came to an agreement of showing only important points and main meridians by default $\Rightarrow$ Show the others on zooming in to a specific scale level instead
Dr. Nhan and team took a quick look at Google Maps for referencing about their approach to solve the similar problem	1, 2, 3, 4, 5	
Dr. Nhan asked team to demo the quick search feature	1, 3, 5	Dr. Nhan appreciated the auto focus and auto zoom into focus for the selected item. However, she do believe it should be added more effects to let user know what they can do next.
Dr. Nhan gave feedback about the information box	1, 2	Although the information is limited to the description only, the View details box should be moved to the bottom of the information box, so users would have a complete flow of reading the description and deciding whether to view more details or not

Action / Discussion	Person responsible	Note (if available)
Team demo choosing a meridian from the select box on the right side panel for quick focus	1, 3, 4	Dr. Nhan suggested that it is nice to auto focus and highlight the meridian on selection. However, she believed it would be better if by default only the focus effect is added. Users may choose to either select the meridian or not, so the box showing information would not be displayed automatically (which can cover up to a part of the scene) after selection.
Dr. Nhan asked about why the acupuncture points are condensed in one side of the body only.	1, 3	Team responded that in fact, the acupuncture points have symmetric property, meaning that one point would have two different locations to trigger on 2 different sides of the body. Showing both of them would be too condensed and difficult to interact ⇒ Team followed the common approach on medical diagram about acupuncture points and meridians, showing only 1 side ⇒ Dr. Nhan accepted the answer and told the team to note it down as one possible question during Defense or Review
Dr. Nhan asked for any other changes. Team demo the new Quiz feature with new interactive questions	1, 3, 5	Dr. Nhan appreciated the addition of interactive questions and believed they are very well-defined. She reminded about validating the question content with the university students.

Action / Discussion	Person responsible	Note (if available)
Team demo the Personal Records feature	1, 2	Dr. Nhan thought the feature is good. However, some minor modification should be made in the caption. As the statistics are based on the quizzes attempted, it should be "tested" rather than "learnt", as users may learn without taking quizzes.
Team demo the View on model option from viewing point on details page	1, 3	BUG FOUND: This feature did not work as expected. Dr. Nhan requested fixing this bug in the next updated version.
Dr. Nhan asked about the use of Settings icon on the home page and whether the display image is the logo or the profile image	1, 2	Team explained about the use of image: logo for not logged in and profile image for logged in. The Settings icon would be to mark a user having Admin rights.
Dr. Nhan asked about the plan for the next phase	1, 2, 3, 4, 5	Team agreed to focus on reviewing about Midterm Review presentation in the following week. Then the week after would be spent on updating the second Interactive version
Team notified Dr. Nhan about the updates in client and coordinators	1, 3, 5	Team updated about the change in status of Dr. Liu, continue to be the Client but not giving direct guideline ⇒ Team have full decision on that Team also updated Mr. Petteri continue to be the coordinator of R&D project rather than changing to a new lecturer ⇒ Dr. Nhan updated the information and thought it was a nice situation
Conclusion and Good bye	1, 2, 3, 4, 5	

Attendance report

Member	Joined	Leaved	In-meeting duration
1	1:52 pm	4:15 pm	2h 23m
2	1:54 pm	4:15 pm	2h 21m
3	1:57 pm	4:15 pm	2h 18m
4	2:00 pm	4:15 pm	2h 15m
5	1:55 pm	4:15 pm	2h 20m
